FROM :

SUBJECT : Mobility Plan - Detachment "A"

1. Since my recent return to Headquarters I have thoroughly reviewed the proposed mobility plan for your organization. This is an excellent plan and indicates considerable thought by members of your organization and the 4070th SAG Support Wing.

2. Because of the limited time available prior to deployment it is necessary that you and your staff take immediate action to implement this plan. For your information and guidance the following are the latest deployment dates:

1st Phase 19 March 1956
2nd Phase c/a 12 April 1956
3rd Phase Undetermined

3. While the 3rd Phase deployment date is still not firm this information will be forwarded to you as soon as it becomes available. Certain political considerations must be finalized and a re-evaluation of our equipment and its potential must be made prior to our establishing a firm date for Phase 3 deployment.

4. You should give immediate consideration as to how you expect to box, crate, and package the individual SIOE items and make your requirements known to Project Headquarters as soon as possible.

RICHARD M. BISSELL, JR.
